

PRO PACK SR 900

A complete respiratory protection kit with a convenient and individual storage box. An excellent choice for construction, painting and more.

- Unique inhalation and double exhalation valve design provides an extremely low breathing resistance unmatched by competitive respirators. Easier breathing and greater respirator compliance
- A superior face seal means a very high protection factor
- Non-allergenic, FDA approved TPE respirator
- Extra large 201 square inch P100 filter area provides extremely low breathing resistance, high air flow and extended filter life
- High-efficiency P100 particulate filter offers 10 times more filter effectiveness than required by NIOSH. Each filter tested for 99.997% filter efficiency
- Pre-filter system collects coarse particles thereby extending the life of the P100 filter
- Stackable filters, the P100 particulate filter can be combined with any of the Sundstrom chemical filters creating a personalized combination filter
- The included Organic Vapor / Acid Gas (OV/AG) chemical cartridge can be used by itself or stacked with the included P100 particulate filter based on user's application
- Chemical cartridge with an extra large surface area providing high gas absorption capacity
- NIOSH approved
- Easily fit tested and seal checked
- Can be converted to a remote filter system by attaching SR 905 with hoses

Storage box x1

SR 900 half mask x1

SR 510 P100/HE x1

SR 232 OV/SD/CL/HC/HF x1

SR 221 Pre filter x5

Pre filter holder x1

SR 5226
Cleaning wipe
x1

ID label x1

Sundstrom's comfortable half mask respirator allows the wearer to work longer with less effort, better protection, and at less cost.

This ready-to-go respirator kit includes everything you need.

Better Protection

The Sundstrom P100 particulate filter offers an efficiency level of 99.997% which is ten times higher than NIOSH requires at 99.97%. Therefore, the Sundstrom P100 filter is 10 times more effective and offers 10 times better protection.

The high efficient P100 together with prefilter gives an excellent protection against dust, mold and all type of particulates.

Greater Comfort and Less Breathing Resistance

The Sundstrom flexible and unique design of masks provides a great fit for most face shapes and sizes. Its cupped shape offers a tight seal and outstanding comfort. Coupled with an extremely low breathing resistance, the Sundstrom mask is a favorite on the market.

250% More Air Flow

Our half mask respirator and P100 filter allows breathing rates of more than 250 liters per minute as compared to most competitive products which generally allow only 95 lpm. This means the Sundstrom user can handle much heavier work loads and avoid early fatigue.

Far Less Cost Over Time

The SR 900 is an easy to maintain, reusable mask. Our distinct pre-filter system prevents premature clogging of the particulate filter and extends its life up to 5 times longer compared to many competitive products.
